

Mid Cap Composite

As of June 30, 2017

OBJECTIVE

Long-term capital appreciation by investing in companies selling for less than our estimate of intrinsic value.

INVESTMENT STRATEGY

- To estimate intrinsic value, the business must be understandable, and we must be able to reasonably forecast its cash flows. We seek businesses with sustainable competitive advantages, conservative balance sheets, and management with an ownership mentality.
- Investments are sold when the stock price reaches our estimate of intrinsic value, our estimate of intrinsic value is revised such that there is no longer a discount to intrinsic value, a holding reaches our stated maximum position size, or to raise proceeds for a more attractive opportunity.

PORTFOLIO GUIDELINES

- Typically 40–60 positions
- Maximum position size is 7%
- Top 10 holdings are typically greater than 30% of net assets
- Maximum industry exposure is 20%
- Maximum sector exposure is 30%

Market Capitalization

The portfolio typically invests at least 80% of its net assets in medium market capitalization companies, defined as those companies with a market capitalization between \$1.5 billion and \$20 billion (or, if greater, the maximum market capitalization of companies generally within the capitalization range of the Russell Midcap Index) at the time of purchase.

Diamond Hill Capital Management Inc. (DHCM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS Standards. DHCM has been independently verified for the period 5/31/00 - 3/31/17. DHCM's current verification firm is ACA Compliance Group. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The verification report(s) is/are available upon request. DHCM is a registered investment adviser and wholly owned subsidiary of Diamond Hill Investment Group, Inc. DHCM provides investment management services to individuals and institutional investors through mutual funds, separate accounts, exchange traded funds and private investment funds. A complete list and description of all composites and policies for valuing portfolios, calculating and reporting returns, and preparing compliant presentations are available upon request. The Mid Cap Composite is comprised of discretionary, fee-paying, non-wrap accounts managed according to the firm's Mid Cap equity strategy. The strategy's investment objective is to achieve long-term capital appreciation by investing in medium market capitalization companies selling for less than our estimate of intrinsic value. Medium market capitalization companies are defined as those companies with a market capitalization between \$1.5 and \$20 billion (or, if greater, the maximum market capitalization of companies generally within the capitalization range of the Russell Midcap Index) at the time of purchase. The composite results reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. Composite returns and benchmark returns are presented gross of withholding taxes on dividends, interest income and capital gains. Returns are calculated using U.S. Dollars. Net returns are calculated by reducing the gross returns by either the actual client fee paid or the highest stated fee in the composite fee schedule, depending on the type of client and account, and are reduced by estimated accrued performance based fees where applicable. Only transaction costs are deducted from gross of fees returns. The Russell Midcap Index is the primary benchmark. This index is an unmanaged market-capitalization weighted index measuring the performance of the 800 smallest companies, on a market capitalization basis, in the Russell 1000 Index. The Russell Midcap Value Index is shown as additional information. This index is an unmanaged market-capitalization weighted index measuring the performance of the mid cap value segment of the U.S. equity universe including those Russell Midcap Index companies with lower expected growth values. The Russell 1000 Index measures the performance of the largest 1,000 companies in the Russell 3000 Index. The Russell 3000 Index is an unmanaged market-capitalization weighted index measuring the performance of the 3,000 largest U.S. companies based on total market capitalization. Our selection process may lead to portfolios that differ markedly from the benchmarks presented. Returns may be more volatile than, and/or may not be correlated to these indices, which are for comparative purposes only. The Firm's standard fee schedule for Mid Cap separate accounts is as follows: First \$20,000,000 = 0.75%; Over \$20,000,000 = 0.60%. The dispersion measure is the asset weighted standard deviation of the annual portfolio returns. Only portfolios represented in the composite for the entire year are included in the calculation. The calculation is not performed if the composite contains 5 or fewer accounts for the full year. No alteration of composites as presented here has occurred because of changes in personnel at any time. **Past performance is not a guarantee of future results.** The Global Investment Performance Standards are a trademark of CFA Institute. CFA Institute has not been involved in the preparation or review of this report/advertisement.

AS OF YEAR-END	DHCM	MID CAP COMPOSITE			3-YR ANNUALIZED STANDARD DEVIATION (GROSS OF FEES)
